DETAILED ACTION

Information Disclosure Statement

The examiner has considered the information disclosure statement.

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a measuring device including: analyzing means for switching the polarization orientation so as to allow only the same polarized component as the polarized light incident on the object to be measured to pass, out of the interference lights obtained through light synthesizing means, in combination with the rest of the limitations of claim 1.

As to claim 4, the prior art of record, taken alone or in combination, fails to disclose or render obvious a measuring device including: an analyzer which is disposed on the light incident side of an image pickup member, and which has a function of switching the polarization orientation so as to allow only the same polarized component as the polarized light incident on the object to be measured pass, out of the interference light fluxes including the light flux which is made to exit from said object to be measure, in combination with the rest of the limitations of claim 4.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2877

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S.

Patent No. 3,694,088 to Gallagher et al. (hereafter Gallagher).

As to claims 7 and 8, Gallagher discloses a method of wavefront analysis including:
making light fluxes in mutually different polarization orientations incident on an object to be
measured by rotating a quarter waveplate; measuring a wavefront for every polarization
orientation of the light fluxes from said object (see column 3, lines 46-65); and calculating the
average wavefront using the results (see column 4, lines 40-55).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
